

**2018 European Risk Manager  
Survey webinar**  
*Thursday 29 November 2018*  
*12.00 - 12.45 CET*

The Federation of European Risk Management Associations (FERMA) and PwC are pleased to invite you to a webinar that will cover the results of the 2018 European Risk Manager Survey on 29 November.

With over 700 respondents from 29 countries, this survey is unique in Europe and provides valuable insight into the Risk Manager's job: their profile, missions, interactions within the company, and their perception of and practices in insurance management.

During the webinar, Risk Managers from different backgrounds will share their experience on three key issues addressed in the report:

- the use of new technology
- the Risk Manager's involvement in defining organizational strategy
- the evolution of the profession in the face of an increasingly heterogeneous risk management landscape

Join us on 29 November for a holistic and in-depth look at the Risk Manager's role and responsibilities which will help you orient your future actions.
